

Darshan Kumar

FRONTEND DEVELOPER

About Me

I'm a front-end developer that can construct dynamic, responsive websites using HTML, CSS, and basic JavaScript. My area of expertise is improving user experience through content organization, element styling, and interactive additions. In my designs, I give cross-browser compatibility and accessibility first priority. I work hard to apply cutting-edge front-end development approaches and best practices by always learning and growing.

Experience

Web Development

I've worked on a variety of HTML, CSS, and JavaScript beginner and intermediate level projects, such as calculators, registration, and _do_list dynamic Print user, data, and display on the same page from there.

Frontend Developer

- My area of expertise is creating engaging and captivating landing pages for websites that are responsive to different screen sizes. I guarantee smooth user engagement and seamless adaptability by utilizing HTML5, CSS, and JavaScript. User experience is my top priority when designing, and I utilize eye-catching graphics and simple navigation. I combine cutting-edge design principles with effective coding techniques because I'm passionate about making a lasting impression.

Projects

Final Project:

created a landing page website as a final project utilizing HTML, CSS, and API. Final Project Link Here: <https://tourmaline-fenglisu-778eb4.netlify.app>

Mid Project Using Html, CSS :

Ecommerce Website URL: <https://spontaneous-pasca-859c65.netlify.app>
